

A large, cylindrical, rusted metal projectile, likely a high-explosive (H.E.) round, is lying horizontally on the ground in a trench. The projectile is heavily corroded and has a mottled, brownish surface. It has a slightly tapered shape with a rounded nose on the left and a slightly wider base on the right. The background consists of dark, moist earth and some dry twigs and debris. A red-bordered text box is overlaid at the bottom of the image.

Projectile, 155 mm M107 H.E. 95 lbs.  
Explosives TNT 15.13 lbs. Length 26".
