

Traffic Update

Digging and Hauling Soil on Fort Ord Beginning Mid-December 2009

Some residents of Del Rey Oaks, upper Seaside and Ord Military Community (Fitch and Marshall Parks), students and faculty at California State University Monterey Bay as well as students using the York School athletic fields may see an increase in Fort Ord truck traffic over the next few months.

WHY? The Army will be digging-up soil in the Impact Area then transporting the soil to the OU2 landfills. All trucks will be covered with tarps. A map and schedule is on the back side of this flyer.

- From December 21-23, 2009, soil will be hauled on General Jim Moore Boulevard and South Boundary Road from 9:00 a.m. to 2:00 p.m. There will be a person flagging traffic on South Boundary Road.
- From December 28, 2009 through January 2010, soil will be hauled to the OU2 landfills from 8:00 a.m. to 5:00 p.m.
- From February 2010 to April 2010 and again during July 2010 soil will be hauled to the OU2 landfills from 8:00 a.m. to 5:00 p.m.
