

# Upcoming Groundwater Cleanup Activities

---

## Installing a Portable Groundwater Treatment System Beginning Mid-July 2009

Some residents of Preston Park and Abrams Park may see workers and equipment in areas behind their homes over the next few months. Typical well drilling equipment is shown on the photo to the right.

**WHY?** In July, the Army will be installing shallow groundwater wells, underground piping and placing a groundwater treatment system (see photos below) as part of the on-going water cleanup at the former Fort Ord. A map of the area for well drilling is on the reverse side. The system will be used to clean the groundwater.

**YOUR WATER IS SAFE:** The groundwater being treated in this area is not used for drinking water. Your drinking water is supplied by the Marina Coast Water District from a different source area. Drinking water quality is very important and it is regularly tested by the Marina Coast Water District. Your drinking water meets all federal and state standards.

### **QUESTIONS:**

**Melissa Broadston, U.S. Army Fort Ord BRAC Office**

**Email: [Melissa.Broadston@us.army.mil](mailto:Melissa.Broadston@us.army.mil) or Phone: 393-1284**

**[www.FortOrdCleanup.com](http://www.FortOrdCleanup.com)**

In July and continuing through October, you will see construction worker using well drilling equipment (see photo of well drilling equipment on the front page of this fact sheet) in this area.

Work will take place from about 8:00 am to 5:00 pm Monday through Friday. No weekend work is planned.
