

**Table 32. Summary of California Linderiella Monitoring Results
1999 Annual Monitoring Report
Former Fort Ord, Monterey County, California**

Waterbody	California Linderiella Abundance ^a			
	January	February	March	April
1	NS	Low	Moderate	Low
2	NS	--	--	--
46	NS	--	--	--
47	--	--	NS	--
48	--	--	--	--
49	--	Low	--	--
50	NS	--	--	--
51	NS	--	--	--
MHLE	NR	NR	NR	NR
MHLW	NR	NR	NR	NR
17	NR	NR	NR	NR

MHLE Mudhen lake east
MHLW Mudhen lake west

^a A qualitative estimate of abundance is based on the total number of California linderiella observed from 20 or 40 random samples (depending on water body size) collected with a dipnet from throughout each pool.

Abundance is defined as follows:

"--" : None observed.

Low: 1 to 10 linderiella observed.

Moderate: 11 to 100 linderiella observed.

High: 101 to 300 linderiella observed.

Very high: more than 300 linderiella observed.

NS : Not surveyed.

NR : Survey not required.
